

JAGUAR F-TYPE PROJECT 7

Limited edition 2016 JAGUAR F-Type Project 7 in the most beautiful Ultra Blue with full leather interior in the "Jet Lozenge" grey with ivory contrast stitch with micro piping. These cars were delivered with a huge list of standard options but this particular car comes with the following extra options: 20 inch wheels Storm satin black and polished, illuminated treadplate Project 7, 4 point racing harness Project 7 and 3 spoke round suede/cloth Project 7 steering wheel.

This particular Project 7 was one of the 10 cars that were supplied to Belgian Jaguar dealers. It has a full set of Belgian documents and is ready to be registered in any European country without any problems. It only has 950 km on the odometer and is in perfect condition. As new.

What started as a hobby project inside the design department of Jaguar ended with the SVO (Special Vehicle Operations) as a collectors edition sport scar with a limited production run on only 250 cars worldwide. It is the fastest and most powerful Jaguar ever, capable of reaching 60 mph in just 3.8 seconds and has a limited topspeed of 186 mph (300 km/h). The engine is a supercharged 5.0 litre V8 producing 575 hp. Attached to a 8 speed Quickshift transmission with electronic differential. Carbon ceramic brakes with yellow calipers and unique tune adaptive dampers, special engine management and chassis stability control.

Its design came from the SVO and it had only one purpose. Driving pleasure. Making a stunning modern motoring icon. A true Jaguar. A new classic. It is still a road car, but it is quite capable on the track. They plucked roadsters off the line and every part they removed was replaced with something

CAR CAVE

lighter. Even the small plastic engine cover is gone. Why? Weight of course.
