

## PORSCHE 911 3.2 CARRERA

Beautiful 1983 Porsche 911 3.2 Carrera

Power comes from the flat six air-cooled boxer engine with 3200 cc and Bosch LE-Jetronic fuel injection, attached to a 5 speed 915 manual gearbox. The 3.2 carrera engine type 930/20 delivers 231 hp. Giving this 911 an acceleration from stand still to 100 km/h in 5.4 seconds and a top speed of 242 km/h. attached to a 5 speed 915 manual gearbox.

Our example was delivered new in Oktober 1983 in Germany. Delivered in Belgium in 1985.

The last owner in Belgium required the car in 2015. An official Porsche dealer serviced the car including a big service. The maintenance book is present. She has not been driven much that is the reason for the sale.

Interior and mechanically she is very sound, exterior she has 2 small defects.

She is priced to sell and for someone to enjoy.
