

LAND ROVER DEFENDER 110 CREW CAB

2012 Land Rover Defender 110 Puma 2.2 Prindiville with the 2.2L engine producing 122 bhp. The Land Rover car design takes us back to a beach in Wales, just after WW2. The very beginning of Land Rover itself is the fabled story of brothers Maurice and Spencer Wilks, sketching out the simple design of what would become an enduring and iconic classic 4WD vehicle. A simple design, because times were hard. Cause, well, the war. Materials, even the most basic ones, were hard to come by. Remind anyone of this past year?

Hard times require a vehicle that is tough as nails. But with a dash of fun thrown in. Ready to tear up the nearest dirt road or a quick jaunt into town. Yes, even in winter. This is after all a car for hard men/women/people. However you identify, you can find yourself in this beautiful beast. Coping with hard times and having some fun doing it is in its bones. 73 years after its conception it is relevant as ever. Even if you don't want to go hauling livestock. You can always drive it to the next Woodstock. This iconic example which we are presenting here today, is quite a special one. Not only is she a 5 door crew cab but she has been cosmetically upgraded by Prindiville in London. When you open her door you will find a custom interior finished in a soft black leather with contrasting red stitching. This not only gives her a sporty feeling but reminds you that you are driving something special. Also, the seats have been upgraded to the sporty Recaro bucket seats, which complete the interior to a

CAR CAVE

luxurious finish.

Mechanically she is ready for many more fun miles. She is powered by a Puma 2.2 Turbo Diesel engine which will get you out of almost any situation. We will give her a check and replace the necessary fluids before she leaves to her new owner. Also, her service book indicates that she has been well taken care of by her previous owner showing a full service record.

All in all, this Defender 110 Crew Cab is a true icon that's been given some amazing upgrades. She's a true beauty that's sure to bring joy and excitement to anyone lucky enough to drive her. Don't miss your chance to own a piece of automotive history that's been taken to the next level.

This 110 qualifies for VAT and can be registered as a light truck/ commercial vehicle.
