

LAMBORGHINI HURACÁN STO

2023 Lamborghini Huracán STO powered by the 5.2L V10 producing 640 bhp

A super-sports car created with a singular purpose, the Huracán STO delivers all the feel and technology of a genuine race car in a road-legal model. Lamborghini's years-long motorsport know-how, intensified by a winning heritage, is concentrated in the new Huracán STO. Its extreme aerodynamics, track-honed handling dynamics, lightweight contents and the highest-performing V10 engine to date come together, ready to trigger all the emotions of the racetrack in your everyday life.

The concept is simply to combine the fun and 'emotion' of the Super Trofeo one-make racecar and the competitive spirit of the GT3 racer into a hardcore road-legal package. At least that was the marketing line. Just think of the STO as the Huracán in its purest, lightest and most aggressive form and you'll get a better idea of what it's all about. It is Lamborghini's take on a Pista or LT.

The STO is meticulously crafted with attention to detail. Every effort has been made to shed weight, resulting in the integration of several innovative features. Alongside conventional methods such as thinner glass, optional magnesium wheels, and the widespread use of carbon fiber panels (excluding only the roof and door skins), Lamborghini introduces the 'cofango', a single-piece assembly encompassing the wings, bonnet, and front bumper. This design, reminiscent of the front

CAR CAVE

clamshell of a Miura, serves both functional and evocative purposes, perfectly encapsulating the philosophy behind the STO.

Our Huracan STO was purchased by its first and only owner back in July 2023 who has cherished her since. She was purchased from Lamborghini Brussels and has only covered 1400 kms. We are very pleased to offer this car today as the owner was hesitant to sell her. He specced her in Ad Personam Nero Helene with Blu Nila contrasts. This gives her a sleek but very aggressive look, which looks epic in our book. For the wheels, the Monolock Forged wheels with a diamond finish complete the look. Especially with the contrasting yellow brake calipers.

Inside you will find an equally as impressive interior finished in black alcantara while bringing the blue details inside. As with every hard core Lamborghini, there are no floor mats but aluminium panels to protect the carbon fibre monocoque. To add some creature comforts, a rear view camera was specced aswell as Cruise control and dimming exterior mirrors. There is also an interior mirror, but you can't see anything out of the rear window anyway because of the very cool deck lid.

Mechanically she is as theatrical as she is to look at. Her 5.2L V10 engine is a true gem and because her original exhaust was programmed to stay open, she sings like there is no tomorrow. Her cold start will make the hair on the back of your neck stand up and every downshift will make you giggle like a child. And the best part? The way she drives off course. A hard core track-focused Lamborghini for the street. What is there not to like...

This Huracan STO comes with the 5 year maintenance pack meaning that you can drive her with not a worry in the world. And before you ask, she has not seen a race track in her 1400 kms. So what are you waiting for? Get in touch now before it is too late!

She qualifies for VAT.
