

AUSTIN HEALEY 3000 MK 2 - BT7

British Racing Green 1961 AUSTIN HEALEY MK 2 - BT7 - 4 seater with black leather seats with white piping. Powered by the famous six cylinder in line - 2912 cc with double SU carburetors delivering 124 hp and a top speed of 180 km/h. Attached to a 4 speed manual side shift gearbox with overdrive.

This BT7 was originally delivered to the States. During 1994 the car was imported into the Netherlands and "nut and bolt" restored by the book during 1994-1998. Then it had 1 owner in the Netherlands (1998/2001) The last (lady) owner imported the car into Belgium in 2001. And took it to her 2nd home in the South of France. That is why it only drove 7000 miles after restoration. In the file there are invoice, mot certificates and valuation reports to proof this mileage. So it is an older restoration but still in very sound overall condition and this only because the restoration was professional high quality work. With the car are recent invoices of services done. With a deep gloss in the paint and the chrome spoked wheels this roadster is very elegant. With a decent set of plexi side screens, side pipe exhaust, heater and aluminum fuel tank.

The BT7 is the 2+2 variation of the legendary Big Healey. With his powerful and flexible engine, smooth gearbox with overdrive this roadster is an ideal rally car for several events throughout the year. Or a Sunday afternoon outing. Ready to hit the open winding roads.
